## Profile

Experienced and innovative web developer with over 10 years experience. Proficient in working on a range of sites from small starter sites to large corporations. Able to work productively and instinctively with good initiative. Excellent problem solving skills.

## Key Skills

- PHP MySQL jQuery CSS HTML
- Also practical experience of Laravel, Wordpress Bootstrap 4

## Work/Experience

### 2003 to 2017 Present Freelance Web developer

#### [Ceroc.Com](#)

Worked on numerous projects for the firm mostly on their intranet system including sole development of the design and implementation of their franchise fees accounting system. Developed several modules such as the voucher system, [find the nearest venue](#) and [holiday booking system](#). Prototyped new apps such as Phonegap and facebook integration, created new back end systems such as the [Storage Boys](#) calculator

#### **Pre Ceroc.Com**

Worked on small business sites mostly doing programming for a freelance designer at <http://goodanswers.net/> where I worked on a per project basis both modifying template sites such as Oscommerce and creating bespoke PHP scripts.

### **2001 – 2002 BAE Systems**

1 Year Software Contract programming in ADA Working to ministry of defence standards on safety critical software.

### **1998 to 2001 J and S Marine**

Real Time Embedded Software Engineer. Duties included the design and implementation and documentation of complex real time systems British naval products and sonar equipment. Programming in C, ADA and C++

## Qualifications

**1995 – 2000** – Open University Bsc. Hons 2.1 Specializing in software engineering

**1981 – 1984** – Robert Gordons Institute of Technology Bsc. In Electrical Engineering

## Interests

Physically active and fit. I am a member of the local cycle club and cycle about 100 miles a week. I am interested in all the newest web technologies and have some experience of Laravel, React and Wordpress.
